High-capacity AVIA container – netted sidewalls/sturdy roof - 12 m^3

(Illustrative photograph)

Technical data

Material	Steel sheet
Material thickness (bottom)	3 mm
Net (bottom/doors)	50 x 50 x 4 mm
Weight	900 kg
Capacity	12 m^3
Hook height	1000 mm
Length	3335 mm
Width	1820 mm
Height/with roof	2000/2100 mm

Attributes

- Made of steel sheet/netting.
- Design with full sidewalls and a low-inclined saddle roof.
- The roof protects the content against weather conditions – structure is made of steel profiles.
- The sidewalls and doors are made of netting (50 x 50 x 4 mm).
- The bevelled bottom increases the strength of the structure.
- Equipped for hook-up pulling and with rollers.
- Supplied with duble-wing doors with double securing.
- Surface finish by varnishing – 1x base layer, 1x top layer.

Color variations

- According to RAL sampler.

Product purpouse

- Designed for storage and transport of waste, especially light bulky waste (eg. paper).

Additions

- Also produced in different dimensions.
- Before hook-up pulling the container, it is important to check the locking elements, rollers, door locking system including central door lock (operator from the side), roof and damper when installed. All lids, flaps and doors must be properly closed. The til tor net has to be properly secured.
