PRODUCT No. 8015-2

Perforated endless tape with locks

(Illustrative photograph)

Technical data

Material	Stainless steel
Weight	2,2 kg
Tape width	12 mm
Length	30 m

Attributes

- Made of stainless steel.
- Tightening is carried out by a lock (screw).
- Possibility of adjusting the sleeve diameter.
- Designed to retract large diameters.
- Each tape is packed with 8 locks.

Color variations

- Stainless.

Product purpouse

- Designed for securing hose connections, fastening of larger diameters.

Additions

- **Use:**

  The sleeves are primarily intended for attaching rubber and plastic hoses, rubber sleeves at the pipe ends or fixing the product to support points (posts, walls, brackets, etc.) The tape is inserted into the screw connection and then tightened with a screw. The tape can be disconnected from the screw connection, the is fixed on the hose which we want to attach. The tape is inserted into the screw connection and then tightened with a screw. The tightening sleeves are characterized by a low tightening momentum so that the screw can be easily loosened or tightened. The force is transferred from the screw to the tape with minimal frictional forces with a fixed connection.
