Attributes

It is not suitable to keep any water inside the product in a winter season. The water may become ice and potentially damage the product. The product is made of plastic material and therefore has no fire protection and is therefore a flammable product. Do not store the product in the immediate vicinity of heat sources (e.g. naked fire).

Accessories and documentation are inserted into the top part.

Winter maintenance

The tank must be completely emptied. Disconnect the tank from the intake from downpipe. Set the ta pinto open position. In case of usage of downpipe filter, set it into winter mode.
