PRODUCT No. 8090

Tank for rainwater WOODY WALL – light colour design

(Ilustrative photograph)

Technical data

Material	Plastic (PE)
Capacity	350 l
Weight	35 kg
Connection	19 mm (3/4”)
Width	1240 mm
Depth	400 mm
Height	1000 mm

Attributes

- Made of durable polyethylene (PE) plastic material.
- The material is resistant to weather conditions.
- High durability of the material against UV radiation.
- Rainwater tank with simple wood-like design.
- The advantage of the tank is the storing capability of high volume of water in small space.
- Wind protection and inlet seal DN 19/32 included in scope of supply.
- The tank is equipped with a plug on the sidewall at the bottom part for emptying the tank.
- Equipped with an opening for tap installation (PE tap included).

Color variations

- Design of imitation of light wood.

Product purpouse

- Designed for collection of rainwater from downpipe system.

Attributes

It is not suitable to keep any water inside the product in a winter season. The water may become ice and potentially damage the product. The product is made of plastic material and therefore has no fire protection and is therefore a flammable product. Do not store the product in the immediate vicinity of heat sources (e.g. naked fire).

Winter maintenance

The tank must be completely emptied. Disconnect the tank from the intake from downpipe. Set the ta pinto open position. In case of usage of downpipe filter, set it into winter mode.
