TECHNICAL DATA SHEET

Gravity lock – type A
TYPE: F2Z_2027_0000

Illustrational photograph

COMPATIBILITY

Designed for plastic 2-wheel containers for collection of municipal waste.

ATTRIBUTES

- Gravity lock assembly for plastic bins.
- Facilitates locking of the lid to the bin against unwanted entry.
- Consists of a lock, a latch, a lower part, a set of two keys and a template for drilling holes.
- The key can be removed in the open position.
- The use of a template is required to drill the holes for installation of the lock.

COLOUR VARIATIONS

Red lock cover.

PRODUCT PURPOUSE

Product is designed for locking plastic bins for collection of municipal waste.

LOCK FUNCTION

- After unlocking the lock, it is possible to remove the key and continue to open and close the container as needed.
- After closing the lid and in order to lock it, the lock must be turned to the locked position with the key – it can be locked even in the open position of the lid and then just close the lid.
- This design is used in areas where it is necessary to ensure access to the waste container for a larger number of users at the same time, e.g. apartment buildings.
- A container fitted with a gravity lock in the locked position is locked again after being emptied by the collection company after the lid is closed.
