TECHNICAL DATA SHEET

Gravity lock – type B
TYPE: F2Z_2027_0002

Illustrational photograph

COMPATIBILITY

Designed for plastic 2-wheel containers for collection of municipal waste.

ATTRIBUTES

- Gravity lock assembly for plastic bins.
- Facilitates locking of the lid to the bin against unwanted entry.
- Consists of a lock, a latch, a lower part, a set of two keys and a template for drilling holes.
- The key can only be removed after locking.
- The use of a template is required to drill the holes for installation of the lock.

COLOUR VARIATIONS

Red lock cover.

PRODUCT PURPOUSE

Product is designed for locking plastic bins for collection of municipal waste.

LOCK FUNCTION

- Once the lock is unlocked, the key cannot be removed until the lock is turned back to the locked position.
- After closing the lid and in order to lock it, the lock must be turned to the locked position with the key – it can be locked even in the open position of the lid and then just close the lid.
- This design is used in public areas, where it is necessary to secure the waste container against unauthorized use, e.g. a sidewalk near a family house.
- A container fitted with a gravity lock in the locked position is locked again after being emptied by the collection company after the lid is closed.
